HOWDY FOLKS:

Again We Say Thank You;

For your many visits and orders this past season. You are always Welcome at Azalea Glen, come often during the season and enjoy the beauty of the 400 varieties of Camellias you will find blooming here during the winter months.

Here the first part of Sept., we find Prof. Sargent, Sophia and Peona-flora giving us flowers.

The Diakagura's are showing color and will soon be in bloom and from then on as cooler weather comes, different varieties will be in bloom, until warm weather in April stops the parade.

TERMS; We guarantee our stock to be true to name and properly packed; Our responsibility for delivery ceases when we have delivered the stock in good condition to the transportation company or carrier. Any claim for breakage should be made to them on receipt of stock.

ALL ORDERS CASH; We do not ship C.O.D. Add sales tax if your State demands sales tax.

TRANSPORTATION; How and when do you want your order sent; Parcel Post; Motor-Express; Railway Express; or Freight.

We close Sundays.

CAMELLIAS

To you who live in the northern section of the U.S.A. You can have Camellias too. They are easy to grow, just the same as other house plants, it takes time and care just the same as you give your other plants.

Keep plants well watered but not sloppy, if leaves on the plants turn yellow, try using rain water, and giving each pot plant three table-spoonsfull of sulphur. Sulphur makes the soil acid. Camellias with buds do not like to be in a room that is too hot, keep them where it will be about 45 to 50.

Here in the south we must not plant camellias too deep, we always here at the nursery plant them one inch higher than they were grown in the nursery row.

Always pick a balled and burlaped camellia up by the ball of soil, never by the stem.

We plant on firm ground, and have the hole dug larger then the camellia ball, so that we can put plenty of good soil mixed with peat-moss around the plant, never under, as placing soft soil under a balled plant will let it settle later on and your plants will be planted too deep.

We leave the burlap on our camellias when we plant them.

Always water well when planting and during all dry weather the first year.

Camellias with scale or red-spider should be sprayed with Volck; Using it at the rate of One to seventy-five.

We fertilize our plants early in the spring, in June and a light application in the fall.

If there is any information that we can help you with your ~~pants~~ ^{plants} write, we are always glad to help.

CAMELLIAS

- ADAH PEARL — M — Large Semi-double pink.
Vigorous, upright growth — Grafts — \$5.00
\$7.50
- ADOLPHE AUDUSSON — M — Very large semi-
double, bright red — Grafts — \$5.00 and \$7.50

15c Each

GROWING GOOD AZALEAS

Azaleas will grow in full sun or in the shade, in the sun you will have brighter colors. Azaleas can be used as pot or tub plants, in sections of the country where the weather man gives too much ice and snow.

Azaleas like acid soil, they love peat-moss use plenty of it in the potting soil or when you plant them in the lawn. A mixture of peat-moss, leaf-mold and cow manure makes a very good mixture to use in planting azaleas.

We fertilize our plants early in the spring, in June and a light application in the fall.

For scale and red-spider spray with Volck, using it, one to fifty. If there is only a light infestation of scale use Volck one to seventy-five.

Keep the plants well watered during all dry weather.

INDICA AZALEAS

This is the large flowering variety that grows so well here in the South Pride of Mobile; Water-mellon-red; Compact grower; Midseason bloomer.

Heavy two-year plants; 30c each, 12 for \$2.50.
